THERMOSTATIC  
CARTRIDGE

## CA43-112

THE REVERSE CARTRIDGE BY VERNET

## VERNET TECHNOLOGY INSIDE

The **CA43** cartridge range gives you the best temperature regulation and safety in accordance with various standards

- ✓ A high technology thermoplastic polymer
- ✓ Anti-scald function on each cartridge
- ✓ Used in mixing valves for temperature limitation
- ✓ Includes a special Vernet thermostatic element
- ✓ Simplified design without compromise on efficiency
- ✓ Ensures the steadiest mixed outlet water temperature
- ✓ Offers long life product reliability

QUALITY

Each cartridge is **individually checked** for stability, flow, operating torque, leakage and anti-scald function

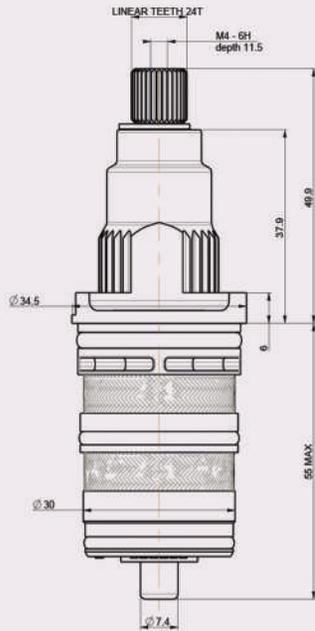

## REVERSED INLET WATER CARTRIDGE

The CA43 reversed-inlet water cartridge is designed to ensure proper operation when the hot and cold water supplies are connected in reverse. It allows the cartridge to function correctly even if the hot and cold water inlets are inverted.

- ✓ A wide range of cartridges with various regulation standards and flow capacities for your different needs (shower, bath, central thermostat, high and low pressure, high flow, ...) with one single geometry
- ✓ A special service to your plumbers - better changing a thermostatic cartridge instead of changing complete piping!

CA43 (in mm)

# DIMENSIONS

# CA43 REVERSED (inlets)

# RECOMMENDATION

- ✓ **The** performance of the mixing valve does not only depend on the cartridge but also on the construction of the valve body and other devices.
- ✓ **Flow rate** might be slightly lower than regular CA43 cartridge due to special inner system. This should not affect the shower experience.
